CALL FOR
MAKERS!

OPEN CALL

STORE

JOIN THE FAB CITY STORE !

Do you work in a makerspace, a fablab or a shared workshop? Do you have a developed product ready for sale and are looking to enhance it? This call is for you!

As digital tools become more accessible and the logic of sharing is required, several topics question the economic models developed by users of makerspaces:

What are the new distribution channels for their work and products at the time of the Fab City? How to strengthen the links between global creation and local manufacturing? What already available products prefigure the Fab City? What does the store of the future look like here and now?

To answer these questions, we are pleased to announce the launch of the Call to Participation of the Fab City Store!

This pop'up store will be held from July 11 to 22 in the Parc de la Villette at the Fab City Summit. It will present a selection of manifest products prefiguring the future market of the Think global / Make local through four entries.

The outcome : a presentation of the selected products during the Fab City Summit from July 11 to 22, 2018 and an international jury to reward the best product makers of the year at the opening of the Fab City Campus!

ENTRIES

FROM FAB CITY STORE

Local Corner

Objects designed and made by creators in makerspaces, shared workshops and fablabs within a radius of 10 km around Paris.

The selected products will be presented as small series or single copy. The selected products must be ready for sale and made by the makers. They will be physically presented on the store.

Glocal Factory

Objects designed by European designers but made in makerspaces and fablabs within a radius of 10 km around Paris.

A minimum stock of one unit will be present on the store, orders will be manufactured on demand.

Products offered for call must be properly documented and shared. The designer will have to make sure of the feasibility of his product in distributed manufacturing (specifications will be transmitted to the designer).

Custom Lab

Custom objects on site at the Fab City Store

Products to be personalized: finished product on which is proposed a customization (laser engraving, vinyl cutting, transfer, serigraphy, flocking, uv printing ...). This format only applies to flat or flat products. A personalization interface will be available on site as well as a PC equipped with a graphic suite.

Workshops

Workshops from idea to object at the Fab City Store

Workshops of 1h maximum for 6 people minimum to guide in parallel. During machining times, a visit of the Fablab will be offered to people by the Vilette Makerz team.

You can compete in one or more of the four entries .

SELECTION

Calendar

June 15th - End of applications

June 17th - Selection process

June 17th - Announcement of the winners

July 1st - Sending of additional documents and finalization of files
